

Blood Products study day 2022

1st March
5th July
18th October

Course runs from 0830—1600
PDU Training room

AIM: Designed for those staff with IV certification (or heading towards it). Aimed at all staff who are involved in Blood and Blood Product transfusions including RMOs and nurses. Not relevant for those staff not performing or requesting blood transfusions.

OVERVIEW: The following topics are discussed throughout the day:

- Blood bank specimen labelling requirements
- Documentation, nursing administration requirements and audits
- Reason to transfuse (or not)
- Adverse events in transfusion
- Massive transfusion protocols and emergency transfusions
- Warfarin reversal
- General discussion time for any other questions or concerns

LEARNING OUTCOMES: To safely and confidently administer blood and blood products with an ability to deal with adverse events and unexpected complications or problems.

Facilitator Profiles

Raewyn Cameron: Charge scientist, Blood bank
Ulrike Buehner: Specialist anaesthetist
Kim Heus: Specialist Anaesthetist
Kate Laidlow: Specialist IV Therapy nurse
Chris Corkery (Waikato): Transfusion resource nurse
